The Corcoran Report

4Q | 2023 | MIAMI BEACHES & MIAMI COASTAL MAINLAND

Miami Beaches

The Miami Beaches include the following areas: Sunny Isles Beach, Bal Harbour, Bay Harbor Islands, Surfside, Miami Beach, Fisher Island and Key Biscayne

Demand for Miami Beaches real estate cooled further due to high interest rates; climbing prices, insurance, and taxes; limited inventory at crucial price points; and world events. With these factors keeping many buyers on the sidelines, condo sales fell year-over-year for the seventh consecutive quarter. However, single-family sales increased for the first time in two years. Annual percentage shifts in median price also diverged by product type, rising for condos but declining for single-family homes. Amid slower sales and buyers' "wait and see" approach, inventory increased annually but remained below pre-pandemic levels.

Miami Beaches

CONDO / CO-OP / TOWNHOUSE

For the seventh consecutive quarter, sales and dollar volume in the Miami Beaches fell by double-digits. However, median prices climbed year-over-year as the market share of sales over \$250K expanded. Both average price and price per square foot rose for the second consecutive quarter, driven by a flurry of luxury closings over \$10M throughout the Miami Beaches. Inventory was up 11% versus a year ago due to the overall moderation in demand and an increase in newly listed inventory in Fourth Quarter 2023.

- Closings fell 17% annually to 639 sales, the lowest Fourth Quarter since 2018.
- Average price per square foot continued to rise, up 8% year-over-year to just over \$950.
- Median price rose annually for the fifth consecutive quarter, up 9% year-over-year as the market share of sales over \$250K expanded.
- At \$764M, sales volume fell 9% annually to its lowest Fourth Quarter level in over a decade.
- The highest price per square foot this quarter was \$4,631 for a 15th floor waterfront condo at Apogee in South Beach.

SINGLE FAMILY

Fourth Quarter 2023 Miami Beaches single-family sales rose 30% year-over-year, the first yearly increase since 2021. Bolstered by high-end waterfront transactions, sales volume rose 33% year-over-year—the second-largest annual increase in over two years. These super-luxury deals, including a \$79M closing on Indian Creek Island, propelled the quarter's average price gains. Similar to condos, supply increased from last year, to 406 units.

- Single-family home sales rose 30% versus a slow Fourth Quarter 2022 to 70 closings.
- While median price fell by 37% versus 2022, both average price and average price per square foot increased annually due to multiple ultra-luxury closings over \$10M.
- Days on market fell 41% year-over-year to under 100 as an influx of newly listed inventory under \$2M drew buyers back into the market.
- The highest-priced single-family sale recorded was also the biggest sale in Miami-Dade County: 12 Indian Creek Road in the Bay Harbor Islands, which closed for \$79M.

Miami Coastal Mainland

The Miami Coastal Mainland covers the following areas: Aventura, Edgewater, Downtown Miami, Brickell, Coral Gables and Coconut Grove

Annual shifts in supply and demand statistics were less significant for the Miami Coastal Mainland than for the Miami Beaches in Fourth Quarter 2023. Similar to the beach, closings and sales volume differed by product type. For condos, sales and volume fell year-over-year, while both statistics increased annually for single-family residences. Inventory for both product types increased annually, as slower sales combined with an increase in new listings during the quarter. Price metrics remained level or rose versus 2022, as buyers priced out of the Miami Beaches turned their attention westward.

Miami Coastal Mainland

CONDO / CO-OP / TOWNHOUSE

Miami Coastal Mainland condo closings and sales volume fell annually by 6% and 7%, respectively, in Fourth Quarter 2023—the sixth consecutive quarter that both sales figures declined. Reminiscent of last quarter, inventory rose by double digits to over 2,800 units alongside the dip in sales activity. Price statistics were essentially unchanged versus a year ago for condos, which had the benefit of lowering marketing timelines by over 25% year-over-year. Negotiability deepened by one-half point in favor of buyers.

- Closings declined 6% versus last year to just under 800 sales. Coming off a robust 2022, sales figures have declined annually for the past seven quarters.
- Average price, median price and average price per square foot were largely unchanged versus Fourth Quarter 2022. Condo price statistics have not fallen annually since before the pandemic.
- Average days on market fell by double-digits versus last year to 82 days, a five-quarter low.
- The highest price per square foot for Fourth Quarter 2023 was \$2,665 for a penthouse condo featuring bay views at SLS Brickell.

SINGLE FAMILY

Versus last year, single-family closings and sales volume increased marginally, up 2% and 5%, respectively. This was the first time since before the pandemic that both figures rose year-over-year. As with the Miami Beaches, inventory increased compared to 2022, albeit slightly, up 2% to 337 listings. Median price jumped 31%, driven by an increase in the market share of sales over \$2M increased to 53% from 33% a year ago. With the increase in sales activity, days on market fell year-over-year, though the increase in inventory did cause negotiation to deepen by a slight 1% annually.

- Single-family home sales increased 2% year-over-year to 105 closings, the first annual increase since Second Quarter 2021.
- Average price per square foot at \$943 remained level with last year. This was the first time in three quarters that average price per square foot did not decline on an annual basis.
- Day on market fell 26% to 76 days, the first annual decline a year.
- The highest-priced single-family sale was 3590 Crystal View Court in Coconut Grove, which closed for \$18.5M.

Methodology

METRICS

METRICS previous quarter statistics for sales and prices are revised in the subsequent report once data are available for the full quarter period.

CLOSED SALES figures for the current quarter are based on reported transactions at the time the report is prepared.

DAYS ON MARKET averages how long a unit takes to sell and is calculated from subtracting list date from contract date. Units on the market longer than three years and shorter than one day are considered outliers and removed from the data to prevent significant skewing. New developments are excluded because many available, unsold units are held off the market for long periods of time.

AVERAGE PRICE PER SQUARE FOOT is the average price divided by the average square footage. In prior Corcoran Reports this was calculated as an average of all prices per square foot, which gives a number less skewed by high price sales and more similar to a median price per square foot. The two metrics are now separated to give more insight to market dynamics.

LISTING DISCOUNT is the percentage difference between the average of the verified sale prices and last asking prices.

MEDIAN PRICE is the middle or midpoint price where half of sales fall below and half fall above this number.

INVENTORY is a count of all currently listed units and is measured at the end of the quarter. It does not include unsold yet unlisted units in new developments ("shadow" inventory).

SOURCE

Figures in this report are based on publicly reported closed sales information via the Miami MLS and Florida State public records system.
